SHORT SYLLABUS

BCSE101E Computer Programming: Python

3 Credits (1-0-4)

Fundamentals of problem Solving. Basic constructs in python. Control Structures. Collections. Strings and Regular Expressions. Functions. Files and Packages.

BCSE101E	Computer Programming: Python		L T	Р	С				
D	NIII		1 0	4	3				
Pre-requisite	NIL	Syllabus version							
Carrage Objecti			1.0						
Course Objecti									
 To provide exposure to basic problem-solving techniques using computers. To inculcate the art of logical thinking abilities and propose novel solutions for real world 									
	ugh programming language constructs.	115 10	i i c ai	wone	ı				
problems und	ugii programming language constructs.				—				
Course Outcon	ne								
	ous algorithmic approaches, categorize the appropriate d	ata re	prese	ntati	on.				
	trate various control constructs.		μ.σσσ		· · · ,				
2. Choose appropriate programming paradigms, interpret and handle data using files to									
	ution through reusable modules; idealize the importanc		_						
packages.									
<u> </u>									
Module:1 Intre	oduction to Problem Solving			1 h	ou				
Problem Solving: Definition and Steps, Problem Analysis Chart, Developing an Algorithm,									
Flowchart and P	seudocode.	. •							
Module:2 Python Programming Fundamentals									
	ython - Interactive and Script Mode - Indentation - Com								
	ds – Data Types – Operators and their precedence – Exp	ressic	ns – I	3uilt-	in				
	orting from Packages.			2 ho					
Module:3 Control Structures									
	and Branching: if, if-else, nested if, multi-way if-elif state								
•	loop – else clauses in loops, nested loops – break, o	contin	ue ar	id pa	388				
statements.			1 .						
Module:4 Col				3 ho	urs				
	cess, Slicing, Negative indices, List methods, List compre								
Tuples: Create,	Indexing and slicing, Operations on tuples – Dictionary: Co		add,	and					
	Operations on dictionaries – Sets: Creation and operations	S	1 .						
replace values,	· · · · · · · · · · · · · · · · · · ·			2 ho	urs				
replace values, Module:5 Stri	ngs and Regular Expressions								
replace values, 6 Module:5 Stri Strings: Compa	ngs and Regular Expressions arison, Formatting, Slicing, Splitting, Stripping – Reg	gular			ns				
replace values, Module:5 Strings: Comparatching,	arison, Formatting, Slicing, Splitting, Stripping – Reg	gular			ns				
replace values, Module:5 Strings: Compa Matching, Search and rep	arison, Formatting, Slicing, Splitting, Stripping – Reg ace, Patterns.	gular	Expre	essio					
replace values, of Module:5 Strings: Comparatching, Search and rep	arison, Formatting, Slicing, Splitting, Stripping – Regace, Patterns. ctions and Files		Expre	essio B ho	urs				
replace values, Module:5 Strings: Comparatching, Search and rep	arison, Formatting, Slicing, Splitting, Stripping – Reg ace, Patterns.		Expre	essio B ho	urs				

with default values – Local and Global scope of variables – Functions with Arbitrary arguments – Recursive Functions – Lambda Function. Files: Create, Open, Read, Write, Append and Close – tell and seek methods.

Module:7 Modules and Packages

2 hours

Built-in modules - User-Defined modules - Overview of Numpy and Pandas packages.

Total Lecture hours: 15 hours

Text Book(s)

 Eric Matthes, Python Crash Course: A Hands-On, Project-Based Introduction to Programming, 2nd Edition, No starch Press, 2019

Reference Books

- 1. Martic C Brown, Python: The Complete Reference, 4th Edition, McGraw Hill Publishers, 2018.
- 2. John V. Guttag, Introduction to computation and programming using python: with applications to understanding data. 2nd Edition, MIT Press, 2016.

Mode of Evaluation: No separate evaluation for theory component.									
Indicative Experiments									
1.	Problem Analysis Chart, Flowchart and Pseudocode Practices.								
2.	Sequential Constructs using Python Operators, Expressions.								
3.	Branching (if, if-else, nested if, multi-way if-elif statements) and Looping (for, while,								
	nested								
	looping, break, continue, else in loops).								
4.	, , ,								
5.	Strings, Regular Expressions.								
6.	Functions, Lambda, Recursive Functions and Files.								
7.	. Modules and Packages (NumPy and Pandas)								
Total Laboratory Hours 60 hours
